1. Abstract
   The subjects of this team cover R&D studies with respect to target technology for the transmutation of the LLFPs.

2. Major Research Subjects
   (1) Liquid lithium target for production of neutron or muon
   (2) Beam window without solid structure

3. Summary of Research Activity
   (1) Liquid lithium target for production of neutron or muon (H. Okuno)
   (2) Beam window with solid structure (H. Okuno)
