

## Research Facility Development Division Accelerator Group Cyclotron Team

### 1. Abstract

Together with other teams of Nishina Center accelerator division, maintaining and improving the RIBF cyclotron complex. The accelerator provides high intensity heavy ions. Our mission is to have stable operation of cyclotrons for high power beam operation. Recently stabilization of the rf system is a key issue to provide 10 kW heavy ion beam.

### 2. Major Research Subjects

- (1) RF technology for Cyclotrons
- (2) Operation of RIBF cyclotron complex
- (3) Maintenance and improvement of RIBF cyclotrons
- (4) Single turn operation for polarized deuteron beams
- (5) Development of superconducting linac

### 3. Summary of Research Activity

- Development of the rf system for a reliable operation
- Development of highly stabilized low level rf system
- Development of superconducting linac
- Development of the intermediate-energy polarized deuteron beams.

### Members

#### Team Leader

Naruhiko SAKAMOTO

#### Research/Technical Scientists

Kazutaka OZEKI (Senior Technical Scientist)

Kenji SUDA (Technical Scientist)
