

Research Facility Development Division

Research Instruments Group

Detector Team

1. Abstract

This team is in charge of development, fabrication, and operation of various detectors used for nuclear physics experiments at RIBF. Our current main mission is maintenance and improvement of detectors which are used at BigRIPS separator and its succeeding beam lines for beam diagnosis and particle identification of RI beams. We are also engaged in R&D of new detectors that can be used for higher-intensity RI beams. In addition, we are doing the R&D which uses the pelletron accelerator together with other groups.

2. Major Research Subjects

Development, fabrication, and operation of various detectors for nuclear physics experiments, including beam-line detectors which are used for the production and delivery of RI beams (beam diagnosis and particle identification). R&D which uses the pelletron accelerator.

3. Summary of Research Activity

The current research subjects are summarized as follows:

- (1) Maintenance and improvement of the beam-line detectors which are used at BigRIPS separator and its succeeding beam lines.
- (2) Development of new beam-line detectors with radiation hardness and tolerance for higher counting rates.
- (3) Management of the pelletron accelerator and R&D which uses the pelletron.

Members

Team Leader

Hiromi SATO

Research/Technical Scientist

Tokihiro IKEDA (Senior Research Scientist)

Research Consultant

Manabu HAMAGAKI

Visiting Scientist

Takeshi KOIKE (Tohoku University)

Student Trainees

Yuka HIKIMA (Toho University)
Mitsumasa MORI (Toho University)

Keito SANGU (Toho University)
